

ATS/CIRA Colloquium

Piers Forster

from University of Leeds

Hosted by Dave Thompson

3 p.m. Thursday, March 30

**The Rise and Fall and Rise (and Fall) of Simple
Climate Models for Projections of Surface
Temperature**

This talk will look at how simple physical climate models have, and have not, been used in Intergovernmental Panel on Climate (IPCC) Reports. It will detail how the IPCC Sixth Assessment Report chose to base its temperature and sea-level projections on such models, rather than CMIP6 models. Were we right to do this? Maybe not...
